

Cleveland Hospital Diagnostics Report

Patient Information:

Patient ID: CLV24PAT0007

Name: Praveen Chauhan

Referred Doctor: Dr. Sarah Johnson, Cardiology

Requested Date: 2024-08-17

Diagnostic Test Results:

1. CT Scan - Chest (Lungs, Heart, Thoracic Spine):

- Lungs:

- * No evidence of active pulmonary disease.
- * Lungs appear clear with no focal consolidations or masses.
- * No pleural effusion observed.

- Heart:

- * Heart size within normal limits.
- * No signs of pericardial effusion.
- * Coronary arteries show no significant calcification.

- Thoracic Spine:

- * Vertebrae are aligned with no evidence of fractures or dislocations.
- * Mild degenerative changes noted, but no significant abnormalities.

2. X-ray - Chest:

- Lungs:

- * Clear lung fields, no evidence of infiltrates or masses.
- * No signs of pneumothorax or pleural effusion.

- Heart:

- * Normal heart size and shape.
- * No apparent abnormalities in the mediastinal contours.

- Diaphragm:

- * Diaphragms are well-positioned, with no elevation noted.
- * Costophrenic angles are clear.

Impression:

The CT scan and X-ray of the chest show no significant abnormalities. The heart, lungs, and thoracic spine are within normal limits. Mild degenerative changes in the thoracic spine are observed but are not clinically significant at this time. Continued monitoring and routine check-ups are recommended.
